Facebook profile

PROFESSIONAL PROFILE

Full-stack web developer focused on modern, responsive web applications. Brings together front-end interfaces, back-end systems, API integrations, and databases, with attention to accessibility, security, performance, and a polished user experience.

TECHNICAL SKILLS

Front-end development

HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Framer Motion, Zustand

Data & storage

PostgreSQL, MySQL, MongoDB, Redis, Prisma, database design and query optimization

Deployment & collaboration

Git, GitHub, Docker, GitHub Actions, Vercel, Linux, CI/CD, production deployment

Back-end development

Node.js, Express.js, NestJS, Laravel, REST APIs, authentication and authorization, JWT, OAuth

Testing & quality

Playwright, Vitest, Jest, automated testing, debugging, web accessibility, Core Web Vitals

Interface design

Figma, responsive layouts, design systems, reusable components, forms and validation

DEVELOPMENT CAPABILITIES

- Build responsive websites, landing pages, and component-based user interfaces.
- Develop full-stack web applications, dashboards, and administration interfaces.
- Connect front-end applications to APIs, databases, and external services.
- Implement authentication, authorization, input validation, and error handling.
- Improve performance through caching, lazy loading, and query optimization.
- Prepare applications for deployment with testing and maintainable code.

WORKING APPROACH

Understand the product and its users, define the interface and architecture, develop in focused steps, then refine accessibility, performance, and reliability before launch.
